Roman Smunyov

📌 *remote from Dubai*

Senior / Lead Software Engineer

Hard skills

Expert level and love: **JavaScript, Svelte/SvelteKit, CSS, Tailwind, HTML**
"Just" the expert level: **React, Preact, Vue, ThreeJS, TypeScript, jQuery**
Good level: **NodeJS, MongoDB, Angular, Elm** as well as lots of other stuff

Soft skills

Very **easy to talk** to, **critical thinking** and **logical** person with a **high emotional intelligence** who's planning to get MS in Psychology one day.

Experience ~~skills~~

BS in Mathematics. More than **7 years** of serious work in production: **digital agencies, startups, products** – I've faced it all. I led small teams to a win as well as carried projects alone. Been part of some cool crews.

You have definitely heard of some companies I worked at, like **Nord Security** (NordVPN), might have heard about others depending on your location, for example **NLX** (NYC, US) – where I work now or **Altabel** (LT).

I do **pet projects** in my spare time alone and with volunteers including **UX/UI design, product management, development, SEO** and **marketing** – some [succeeded](#) and some not – so I also **know how to fail**.

I programmed **mobile apps, watches, landing pages, games, browser extensions, TV installations** and of course **big enterprise apps**. Know **FP** and **OOP**. But you must be tired to read about me, what about you?
